

Maintenance & Servicing

ASG Stage Products offer supply, installations maintenance of all types of performance facilities, including stage engineering, drapes, lighting, grids, rigging, sound, projection, seating and staging.

Various types of equipment may need to be inspected on an annual basis to maintain their safety and to avoid personal injury. Maintenance of other equipment types may be at your discretion, but even so, regular maintenance can provide peace of mind and reduce the possibility of breakdowns at inconvenient times.

ASG typical inspection/maintenance services can apply to:

- Raise & Lowering (lifting equipment), flying systems, hoists, pulley systems, hemp sets, safety curtains, counterweight sets, stage elevators etc etc. Our services can include for general routine maintenance and/or LOLER certification with the assurance of a thorough examination report in compliance with LOLER legislation 1998.
- Mechanical & Electrical inspection to stage curtain tracks, cable management systems, lantern lights, steel structure/seating systems, stage lighting and sound infrastructures, trussing whether static or moving elements relating to stage equipment services.
- PAT testing to stage luminaires & portable equipment.
- Mechanical & electrical repairs to stage equipment.
- NICEIC or NAPIT certification.
- Yearly, or 3-5 years contracts to suit.

All works are carried out by experienced and competent site operatives in compliance with industry standards.

Maintenance quotations or further information please contact ASG Sales Department.
